

APPB-350 / APPB-350L Tube Film Packing Machine

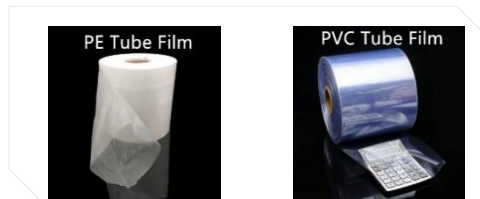

FEATURES:

Tube film packing machine is the newest packing machine. It is an automatic packing machine for tube film. Compare with the traditional VFFS machine, it can be sealed with the film of PP and PE. And it directly using the double-layer tube film, without the limit of the former for a single-layer film. And time for changing formers.

Tube film packing machine is an easy operation and multi-function packing machine. It is for different weight and size product, like machines parts, hardware, medicine, and dry fruit, etc. It has options for manually filling and packing, or connecting with automatic filling machine, like multihead weigher, linear feeder or bowl vibrator, as a whole weighing and packing system.

With Multihead Weigher
